## PROFESSIONAL SUMMARY

Computer Science Engineering student (2026 batch, CGPA: 8.6/10) with strong Core Java and SQL fundamentals. Developed a Home Service Android App, gaining hands-on experience in software development and deployment. Experienced in building real-world applications using AI-assisted development tools. Seeking a Software Developer role to apply problem-solving skills, Java knowledge, and development experience in creating efficient software solutions.

## EDUCATION

2022 – 2026 | CGPA: 8.6 — B.E. – Computer Science and Engineering

Saveetha School of Engineering, Chennai

2020 – 2022 | 95% — Secondary Education – MPC

Krishnaveni Junior College, Khammam

## TECHNICAL SKILLS

Languages: Java (Core)

Database: SQL, MySQL (Queries, Joins, Normalization)

Operating System: Windows

Development: AI-Assisted Development (Vibe Coding) – Concept to Deployment

Tools: Android Studio, Visual Studio Code, GitHub, Figma, Eclipse, PowerPoint

Areas of Interest: App Development, Object-Oriented Programming, DBMS

Soft Skills: Communication, Problem Solving, Teamwork, Time Management, Leadership

## PROJECTS

**Home Service Android App – Published on Google Play Store Oct 2025**

- Designed, built, and deployed an Android application connecting customers with service providers for home services such as maid, cooking, driver, and cleaning.
- Implemented role-based login, service search, slot booking, and payment features using Android, PHP, and MySQL.
- Developed a complete service management workflow with provider verification, booking tracking, and customer rating functionality.

**Hospital Management System – Web Development Project May 2024**

- Designed and developed a hospital management website using HTML, PHP, and SQL for efficient healthcare administration.
- Implemented patient record management, doctor information management, and appointment scheduling features.
- Integrated a MySQL database to securely store and manage hospital, patient, and appointment data.

**Structure Crack Detection – Mar 2024**

- Built a structural crack detection system using image processing techniques to identify cracks in building structures.
- Implemented image analysis methods to detect and classify cracks, improving the accuracy of structural damage assessment.
- Evaluated the system on multiple crack images to analyze performance and support early detection of infrastructure defects.

## CERTIFICATIONS

- Oracle Java Professional Certification
- Agentic AI – Digital Workforce Services Plc
- Oracle Cloud Infrastructure 2024 AI Foundations Associate – Oracle
- Internet of Things (IoT) Elite Certificate – NPTEL

## ACHIEVEMENTS

- Published a Home Service Android App featuring service booking, provider management, and customer interaction functionalities.
- Successfully delivered three real-world projects spanning Android development, full-stack web development, and image processing-based structural crack detection systems.
